

## PS Suite EMR

Help elevate your level of care with the leading EMR choice in Canada.

Developed by a physician for physicians, PS Suite (formerly Practice Solutions) is an advanced, easy-to-use, customizable EMR that captures, organizes and displays patient information in a user-friendly way.

### **See patient data at a glance.**

View data on a single screen and quickly navigate through a patient's medical history.

### **Easily view trends over time.**

Track health metrics and monitor changes with customizable dashboards that graphically display patient data.

### **Receive patient data in your EMR.**

Receive, store and access chronological patient information, from lab results to referrals, in a cohesive record in your EMR.

### **Simplify disease management.**

Use built-in tools and outcomes dashboards to manage chronic diseases.

### **Spend less time on administration.**

Increase productivity with built-in appointment, scheduling, electronic prescription and inter-office communication tools.

### **Simplify billing processes.**

Invoice multiple clients, and track and reconcile government-insured, direct-patient and third-party billing claims.

### **Stay connected in the clinic and on the go.**

Remotely connect to your EMR and provide care on the go - right from your mobile device, with our complimentary TELUS EMR Mobile app.

Increase clinic efficiency and improve the patient experience.

Optimize your workflow, increase collaboration with other healthcare professionals and engage your patients in their own care with powerful add-on tools and services that integrate with your PS Suite EMR.

### Electronic prescriptions

Send electronic prescriptions from your EMR directly to your patient's pharmacy of choice with PrescribeIT™.

### Provider-to-provider communications

Exchange and store unlimited digital and eFax communications with other healthcare professionals with MedDialog.

### Automated reminders

Reduce no-shows with customizable patient appointment reminders that can be sent by email, text or phone.

### Online appointment booking

Let patients book their own appointments online and sync schedules with your EMR.

### Patient portal

Stay connected to your patients with private messaging and group communications through a web-based, customizable portal.

### Digital patient forms

Have patients complete forms online before they arrive or on a tablet in your clinic with information imported into your EMR.

### Patient check-in kiosk

Set up a kiosk in your clinic to help patients manage their own check-in, update personal information and complete applicable forms.

### Wait room management

Manage patient expectations with digital screens that display wait times and patient queue information.

**You're passionate about better patient outcomes. So are we.**

**By working together, we can improve care delivery across the health continuum.**

Turning information into better health outcomes for Canadians.
