

Medesync EMR

Helping you deliver specialized care to your female patients.

When it comes to EMRs, one solution does not fit all. That's why TELUS Health offers **Medesync** - designed by a physician and optimized for OB/GYNs.

Medesync is a 100% web-based, modern, bilingual EMR that's reliable, fast, easy-to-use and can be customized to meet your practice requirements.

Simplify clinical note taking.

Use as much space as you need for your clinical notes without worrying about strict word count or character limits - a feature exclusive to Medesync.

Easily determine due date.

Calculate your patient's expected due date using an automated process based on last menstruation and the number of days in the menstrual cycle.

Optimize your workflow.

Manage routine tests and leverage special tools for high-risk pregnancies and common women's health issues. You can also utilize pre-built obstetrics templates – or create and customize them for your clinic needs.

Monitor pregnancy progress.

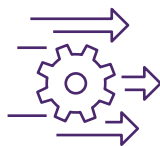

Stay on top of common screening activities using forms and share information directly from your EMR with other health professionals through eFax.

Support obstetrics care.

Easily access provincial obstetric forms, facilitate routine tests, monitor pregnancy progress, access special tools for high-risk pregnancies and help follow fundal growth.

Streamline daily processes.

Quickly and efficiently triage referrals, generate consultation letters and progress notes, and send and receive referrals directly in your EMR.

Increase efficiency.

Pull lab results directly into patient charts for a single view of the patient. You can also view lab and test information over a specified time period.

Find the information you need.

Leverage advanced search analytics to define groups, such as patients with high-risk pregnancies, or track demographics, such as patients with similar expected due dates.

You're passionate about better patient outcomes. So are we.
By working together, we can improve care delivery across the health continuum.
Turning information into better health outcomes for Canadians.
