

Medesync EMR

Helping you deliver cosmetic or reconstructive surgical care.

Designed by a physician, Medesync is a web-based EMR that's bilingual, reliable, fast and easy to use with built-in tools to support the unique needs of your cosmetic or reconstructive surgery practice.

Document cases with photos.

Take clinical photos on your phone or tablet with TELUS EMR Mobile. Add notes, magnify them for clinical clarity with dermatoscope tools, and upload them directly to patient files. Monitor patient progress and compare before and after photos side-by-side. Draw or write directly on your photos for surgical assessments.

Enhance clinic note-taking.

Consult a patient's summary, capture notes, add pictures and fill out forms - all in a single screen. Take notes via stylus, keyboard, acronyms, shortcuts, voice or text recognition. Save time by using checkboxes in custom forms. Prescribe patient medications right from your notes.

Streamline daily processes.

Easily generate consultation reports and progress notes on patients' cosmetic or reconstructive procedures, use customizable templates adapted for plastic and cosmetic surgery and manage your patient waitlists by priorities and criteria.

Manage referrals and consult letters.

Send and receive referrals, and efficiently triage and manage them - right in your EMR. Communicate with providers outside your clinic and share encrypted patient records using MedDialog.

EMR access on the go.

Remotely connect to your EMR from a mobile device with the free [TELUS EMR Mobile](#) app. Access patient and clinic information, manage labs, document symptoms and more.

Bring your EMR to the next level.

Increase your clinic efficiency, integrate powerful EMR add-on tools and engage your patients with Medesync.

Customize your EMR

Easily customize your patient summary and clinical notes, and create your own electronic forms.

Manage lab results easily

Pull lab results directly into patient charts for a single view of the patient. You can also view lab and test information over a specified time period.

Stay connected with patients

Use the patient portal to securely send individual and group messages. Save time with online pre-visit questionnaires, patient bookings and automated reminders.

Provider-to-provider communications

Exchange and store unlimited digital and eFax communications with other healthcare professionals with MedDialog.

Virtual visits

Treat your patients remotely with video visits, access health information and update patient health records simultaneously from your EMR with TELUS EMR Virtual Visit.

Electronic prescription renewals

Process prescription renewal requests from pharmacists directly from your EMR, and automatically update information in both your EMR and the DSQ.

Taking care of your patients is your priority. Supporting you is ours.
By working together, we can improve care delivery across the health continuum.

Turning information into better health outcomes for Canadians.
