Kroll Version 10.35.3.28 HF3 Hotfix Release Notes (21/10/2026)

This document is a compilation of changes and enhancements in Kroll version 10.35.3.28 HF3 (21/10/2026) release. The purpose is to keep users informed of changes to the software and to help users implement and adapt to those changes.

Fill

[KRL-22911] Slowness when filtering sorted lists with large amounts of data

Bug

Changing the filter on a sorted list forced the entire list to be re-sorted, even when the sort did not involve calculated fields. For lists with a large number of records, this caused noticeable slowness. It was most visible in **F12 – Fill Rx**, which filters the sub-plan list repeatedly while rebuilding its menus. Stores with large numbers of sub-plans saw the application show “Not Responding” for several seconds at a time.

Resolution

The sorting logic has been reworked so filter changes no longer force a full re-sort. Lists now respond faster when filters are changed. Sorting on calculated fields now includes records that are filtered out.
