[KRL-26749] Compliance Label generic drug name truncated 3

Kroll Version 10.35.3.32 HF4 Hotfix Release Notes (21/10/2026)

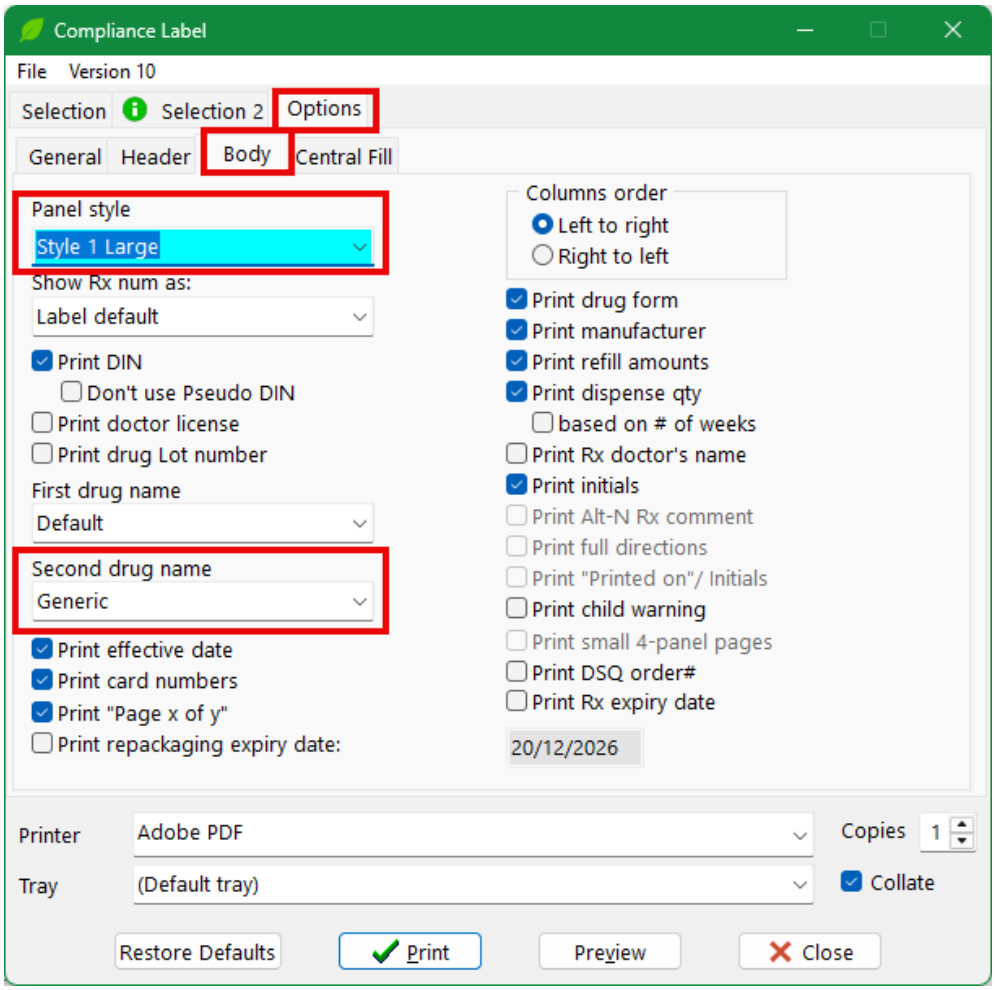

This document is a compilation of changes and enhancements in Kroll version 10.35.3.32 HF4 (21/10/2026) release. The purpose is to keep users informed of changes to the software and to help users implement and adapt to those changes.

Manitoba

[KRL-26749] Compliance Label generic drug name truncated

Bug

For Manitoba stores, the **Compliance Label** (**Style 1** and **Style 1 Large**) always printed the drug card description and price in the second drug name cell. It ignored the **Second drug name** option (set on **Reports** > **Compliance Label** > **Options** > **Body**). As a result, long generic names were cut off or did not print, and the label did not meet Manitoba College of Pharmacists requirements.

Resolution

This issue has been resolved. The **Manitoba Compliance Label** now uses the **Second drug name** option set to **Generic** with **Style 1 Large.** The full generic name prints on up to two lines, and long names without spaces break after "/". The full generic drug name is clearly rendered on the **Compliance Label** without any truncation, complying with Manitoba licensing standards.

Setting **Second drug name** to **Default** keeps the previous behaviour.
