

TELUS Health Safety Groups

A safety group is a group of employers who have decided to take action to help prevent workplace injury and occupational disease, and to promote the rehabilitation and return to work of injured employees.

TELUS Health Safety Groups helps organizations achieve an occupational health and safety level that reflects their commitment to safety, and can help them increase profitability and reduce premiums. Our team manages mutual groups representing around 10,000 organizations in Quebec.

How we help.

CFIB advantages
